The Uses of Enchantment-Bruno Bettelheim 2010-12-22 Winner of the National Book Award and National Book Critics Circle Award "A charming book about enchantment, a profound book about fairy tales."—John Updike, The New York Times Book Review Bruno Bettelheim was one of the great child psychologists of the twentieth century and perhaps none of his books has been more influential than this revelatory study of fairy tales and their universal importance in understanding childhood development. Analyzing a wide range of traditional stories, from the tales of Sindbad to “The Three Little Pigs,” “Hansel and Gretel,” and “The Sleeping Beauty,” Bettelheim shows how the fantastical, sometimes cruel, but always deeply significant narrative strands of the classic fairy tales can aid in our greatest human task, that of finding meaning for one’s life.

A Good Enough Parent-Bruno Bettelheim 1988 Suggests how parents can develop their own insights into child rearing, how to comprehend the children's behavior, and how to cope with situations in ways most beneficial to the child's well-being

The Creation of Doctor B-Richard Pollak 1998-04-06 Drawing on Bettelheim's unpublished papers and more than 225 interviews with his professional associates, former patients, and their parents, this highly critical portrait of one of the most revered psychologists of this century raises important questions about Bruno Bettelheim's integrity--both as a therapist and a man. of photos.

Freud and Man's Soul-Bruno Bettelheim 1984 An examination of Freud's theory of psychoanalysis discusses how the English translations have distorted his writings and describes Freud's view of the nature of the soul

Surviving, and Other Essays-Bruno Bettelheim 1979 Twenty-four essays, selected from throughout Dr. Bettelheim's career, range over the entire spectrum of his concerns

Transformations-Anne Sexton 2016-04-05 Pulitzer Prize–winning poet Anne Sexton morphs classic fairy tales into dark critiques of the cultural myths underpinning modern society Anne Sexton breathes new life into sixteen age-old Brothers Grimm fairy tales, reimagining them as poems infused with contemporary references, feminist ideals, and morbid humor. Grounded by nods to the ordinary—a witch’s blood “began to boil up/like Coca-Cola” and Snow White’s bodice is “as tight as an Ace...
bandage”—Sexton brings the stories out of the realm of the fantastical and into the everyday world. Stripping away their magical sheen, she exposes the flawed notions of family, gender, and morality within the stories that continue to pervade our collective psyche. Sexton is especially critical of what follows these tales’ happily-ever-after endings, noting that Cinderella never has to face the mundane struggles of marriage and growing old, such as “diapers and dust,” “telling the same story twice,” or “getting a middle-aged spread,” and that after being awakened Sleeping Beauty would likely be plagued by insomnia, taking “knock-out drops” behind the prince’s back. Deconstructed into vivid, visceral, and often highly amusing poems, these fairy tales reflect themes that have long fascinated Sexton—the claustrophobic anxiety of domestic life, the limited role of women in society, and a psychological strife more dangerous than any wicked witch or poisoned apple.

Truants from Life-Bruno Bettelheim 1955

The Witch Must Die-Sheldon Cashdan 2000-07-07 A psychoanalytic approach to fairy tales that examines how children can project their own internal struggles onto the opposing characters.

Love is Not Enough-Bruno Bettelheim 1968

Critical and Creative Perspectives on Fairy Tales-Vanessa Joosen 2011 The first systematic approach to the parallels between fairy-tale retellings and fairy-tale theory.

The Sleeping Beauties-Suzanne O'Sullivan 2021-09-21 In Sweden, hundreds of refugee children fall into a state that resembles sleep for months or years at a time. In Le Roy, a town in upstate New York, teenage girls develop involuntary twitches and seizures that spread like a contagion. In the U.S. Embassy in Cuba, employees experience headaches and memory loss after hearing strange noises during the night. These are only a few of the many suspected culture-bound psychosomatic syndromes—specific sets of symptoms that exist in a particular culture or environment—that affect people throughout the world. In The Sleeping Beauties, Dr. Suzanne O'Sullivan—an award-winning Irish neurologist—investigates psychosomatic disorders, traveling the world to visit communities suffering from these so-called mystery illnesses. From a derelict post-Soviet mining town in Kazakhstan to the Mosquito Coast of Nicaragua to the heart of the María Mountains in Colombia, O'Sullivan records the remarkable stories of syndromes related to her by people from all walks of life. Riveting and often distressing, these case studies are recounted with compassion and humanity. In examining the complexity of psychogenic illness, O'Sullivan has written a book of both fascination and serious concern as these syndromes continue to proliferate around the globe.

Little Red Riding Hood-Alan Dundes 1989 "Alan Dundes of the University of California, Berkeley, continues his exploration of well-loved fairy tales with this casebook on one of the best-known of them all: Little Red Riding Hood. The twelve essays are by international scholars representing an impressive cross section of theoretical approaches."--Page 4 of cover.

Symbolic Wounds-Bruno Bettelheim 1962 Bettelheim presents an account of his examination of initiation rites in present-day pre-literate societies and suggests that circumcision and related rituals may be the expression of male fascination with, and jealousy of, female sex apparatus and function. Broadly evaluating prevailing notions regarding puberty rites, Bettelheim describes ceremonies among different tribes--such as ritual subincision among the Arunta, transvestism among the African Changa, and many other customs--and also relates many myths that accompany the rituals.

The Art of the Obvious-Bruno Bettelheim 1993 Addresses a variety of
issues that therapists for children and adults typically face, among them, building a patient’s trust, finding empathy for a violent child, and avoiding preconceptions and prejudices

**Angela Carter’s Book Of Fairy Tales** - Angela Carter 2015-11-19 Once upon a time fairy tales weren’t meant just for children, and neither is Angela Carter’s Book of Fairy Tales. This stunning collection contains lyrical tales, bloody tales and hilariously funny and ripely bawdy stories from countries all around the world - from the Arctic to Asia - and no dippy princesses or soppy fairies. Instead, we have pretty maids and old crones; crafty women and bad girls; enchantresses and midwives; rascal aunts and odd sisters. This fabulous celebration of strong minds, low cunning, black arts and dirty tricks could only have been collected by the unique and much-missed Angela Carter. Illustrated throughout with original woodcuts.

**Breaking the Magic Spell** - Jack Zipes 2002-07-05 Guts and Glory: The Making of the American Military Image in Film is the definitive study of the symbiotic relationship between the film industry and the United States armed services. Since the first edition was published nearly two decades ago, the nation has experienced several wars, both on the battlefield and in movie theatres and living rooms at home. Now author Lawrence Suid has extensively revised and expanded his classic history of the mutual exploitation of the film industry and the military, exploring how Hollywood has reflected and effected changes in America’s image of its armed services. This significantly expanded edition has been brought completely up to date and includes many of the most recent war films, such as Saving Private Ryan, U-571, Pearl Harbor, and Windtalkers. Lawrence H. Suid, a military historian, is the author of several books and has recently appeared on The History Channel, Turner Classic Movies, and CNN. He lives in Greenbelt, Maryland. **The Heroine's Journey** - Maureen Murdock 2020-08-18 This book describes contemporary woman’s search for wholeness in a society in which she has been defined according to masculine values. Drawing upon cultural myths and fairy tales, ancient symbols and goddesses, and the dreams of contemporary women, Murdock illustrates the need for—and the reality of—feminine values in Western culture today.

**The Annotated Classic Fairy Tales** - Maria Tatar 2002 Twenty-six classic fairy tales are supplemented by extensive literary, cultural, and historical commentary.

**Cultural Theory and Psychoanalytic Tradition** - David Fisher 2018-02-06 The culture of psychoanalysis has many traditions and multiple schools of theory and thought. This work presents informative and original investigations into three overlapping areas of psychoanalytic tradition: the history of psychoanalysis; psychoanalytic culture criticism; and the application of psychoanalytic methods to the study of history. In this carefully crafted evaluation of various authors and subjects, Fisher's perceptions are informed by a deep and comprehensive knowledge of the psychoanalytic movement, its interaction with the wider context of European cultural and political history, and its philosophical and clinical origins. In examining the history of the movement, Fisher attempts to discover the fundamental inspiration of psychoanalysis by returning to the origins of the discipline. Freud is the central figure here, but Fisher also looks to the second generation of European analysts, including such maverick figures as Lacan and Spielrein, and mainstream figures as Fenichel to gain insight into the multidimensional and creative personalities.
who were drawn to Freud and his ideas. In his discussion of psychoanalytic culture criticism, Fisher analyzes symbolic meanings and psychological themes from a variety of written works. In an analysis of Freud's Civilization audits Discontents, the author argues that the figure of Romain Rolland is pervasive throughout the text as symbol, muse, stimulus, and adversary. Reading analytic theory and applying it to personalities and situations from the past allowed historians to address issues of their own inner world and to develop breathtaking possibilities for understanding the past. Brilliantly written and historical and critical in method, Cultural Theory and Psychoanalytic Tradition offers valuable insights into significant themes and ambiguities in the diverse areas of psychoanalysis. Intellectual historians and psychoanalysts will find reliable introductions and springboards f

Empty Fortress-Bruno Bettelheim 1967 Focusing on three case histories, the author attempts to reveal the problems and struggles of the autistic child

Enchanted Hunters: The Power of Stories in Childhood-Maria Tatar 2009-04-20 Tatar challenges the assumptions we make about childhood reading. By exploring how beauty and horror operate in children's literature, she examines how and what children read, showing how literature transports and transforms children with its intoxicating

Autism and Representation-Mark Osteen 2010-04-26 Autism, a neuro-developmental disability, has received wide but often sensationalistic treatment in the popular media. A great deal of clinical and medical research has been devoted to autism, but the traditional humanities disciplines and the new field of Disability Studies have yet to explore it. This volume, the first scholarly book on autism in the humanities, brings scholars from several disciplines together with adults on the autism spectrum to investigate the diverse ways that autism has been represented in novels, poems, autobiographies, films, and clinical discourses, and to explore the connections and demarcations between autistic and "neurotypical" creativity. Using an empathetic scholarship that unites professional rigor with experiential knowledge derived from the contributors' lives with or as autistic people, the essays address such questions as: In what novel forms does autistic creativity appear, and what unusual strengths does it possess? How do autistic representations--whether by or about autistic people--revise conventional ideas of cognition, creativity, language, (dis)ability and sociability? This timely and important collection breaks new ground in literary and film criticism, aesthetics, psychology, and Disability Studies.

Into the Woods (movie tie-in edition)- 2014-12-01 Stephen Sondheim and James Lapine's beloved musical masterpiece becomes a major motion picture, starring Meryl Streep and Johnny Depp.

Fire in the Dragon and Other Psychoanalytic Essays on Folklore-Géza Róheim 2021-08-10 The only Freudian to have been originally trained in folklore and the first psychoanalytic anthropologist to carry out fieldwork, Gza Rcheim (1891-1953) contributed substantially to the worldwide study of cultures. Combining a global perspective with encyclopedic knowledge of ethnographic sources, this Hungarian analyst demonstrates the validity of Freudian theory in both Western and non-Western settings. These seventeen essays, written between 1922 and 1953, are among Rcheim’s most significant published writings and are collected here for the first time to introduce a new generation of readers to his unique interpretations of myths, folktales, and legends. From Australian aboriginal mythology to Native American trickster tales, from the Grimm folktale canon to Hungarian folk belief, Rcheim explores a wide range of issues, such as the relationship of dreams to folklore and the primacy of infantile conditioning in the formation of adult fantasy. An introduction by folklorist Alan Dundes describes Rcheim’s career, and each essay is prefaced by a brief consideration of its intellectual and bibliographical context.

Once Upon a Time-Marina Warner 2014-10-23 From wicked queens, beautiful princesses, elves, monsters, and goblins to giants, glass slippers, poisoned apples, magic keys, and mirrors, the characters and images of fairy tales have cast a spell over readers and audiences, both adults and
children, for centuries. These fantastic stories have travelled across cultural borders, and been passed on from generation to generation, ever-changing, renewed with each re-telling. Few forms of literature have greater power to enchant us and rekindle our imagination than a fairy tale. But what is a fairy tale? Where do they come from and what do they mean? What do they try and communicate to us about morality, sexuality, and society? The range of fairy tales stretches across great distances and time; their history is entangled with folklore and myth, and their inspiration draws on ideas about nature and the supernatural, imagination and fantasy, psychoanalysis, and feminism. Marina Warner has loved fairy tales over a long writing life, and she explores here a multitude of tales through the ages, their different manifestations on the page, the stage, and the screen. From the phenomenal rise of Victorian and Edwardian literature to contemporary children's stories, Warner unfolds a glittering array of examples, from classics such as Red Riding Hood, Cinderella, and The Sleeping Beauty, the Grimm Brothers' Hansel and Gretel, and Hans Andersen's The Little Mermaid, to modern-day realizations including Walt Disney's Snow White and gothic interpretations such as Pan's Labyrinth. In ten succinct chapters, Marina Warner digs into a rich hoard of fairy tales in their brilliant and fantastical variations, in order to define a genre and evaluate a literary form that keeps shifting through time and history. Her book makes a persuasive case for fairy tale as a crucial repository of human understanding and culture.

Rising to the Light-Theron Raines 2002 A profile of the noted child therapist draws on the author's long friendship to describe Bettelheim's experiences in the Nazi concentration camps, its influence on his approach to therapy, his work with children, and his 1990 suicide.

Breaking the Magic Spell-Jack Zipes 1979 This text explores, in both historical and critical contexts, the evolution of folk tales and fairy tales, their influence on popular beliefs, the politics behind them and their incorporation in mass media culture today. It focuses particularly on socio-historical forces which have changed the function of fairy tales since the 1700s.

We Get There by Walking-Paul Alcorn 2019-04 The fall after I graduated from college, I spent a month living at a contemplative retreat center in high desert outside of Sedona, Arizona. Silence was the order of the day...and of the night. Those who lived or stayed at the center spoke only at meals or to give instructions for the daily work we did to maintain the center, and during our morning and evening worship services. The rest of our time was spent in silence. In the entrance to the retreat center's common space hung a banner with these words: Pilgrim, there is no way. You make it by walking.

Transforming Tales-Rob Parkinson 2009 This book reveals the true impact of stories on our lives and how stories can create feelings of hope, take away psychological distress and even stimulate the immune system. It contains over 90 short stories, and allows readers to understand the patterns storytellers use to captivate attention and how truths are often encapsulated in stories.

The Third Reich of Dreams-Charlotte Beradt 1985

Cautionary Tales for Children-Hilaire Belloc 1922

You're Not Broken-Sarah Woodhouse 2021-03-30 In one way or another,
we all carry trauma. It can manifest as anxiety, shame, low self-esteem, over-eating, under-eating, addiction, depression, confusion, people-pleasing, under-earning, low mood, negative thinking, social anxiety, anger, brain fog and more. Traumas, big or ‘little’, leave us trapped in cycles of dysfunctional behaviours, negative thoughts and difficult feelings. Yet many people are unaware they’re stuck in old reactions and patterns that stem from their past traumas. Many of us are wary of the word and push it away instead of moving towards it and learning how to break free. Dr Sarah Woodhouse is a Research Psychologist who specialises in trauma and is passionate about helping people face this word and their past. In You’re Not Broken she teaches you what a trauma is (it’s probably not what you think), and how to recognise when, why and how your past is holding you back. She gently explains the pitfalls of ignoring awkward, upsetting episodes and how true freedom comes from looking back at your past with honesty. Then, sharing the latest research-based techniques and her own personal experience, she guides you towards breaking the trauma loop, reawakening your true self and reclaiming your future.

**Educating the Emotions** - N.M. Szajnberg 2012-10-29 Although Bruno Bettelheim died before this book was finished, he was present at its birth. In 1985, we felt we wanted to give him a gift for what he taught us: how to think critically about ourselves and our society; how to inform our emotions; how to move from self-knowledge to empathy for others; and how with such empathy, intum, to enrich and expand ourself knowledge; and most important, how to integrate a sense of personal autonomy with a sense of responsible living with one's community. For many of us, he was our Socrates. His best, most lively teaching was in the presence of a group of questioning, intellectually hungry students. We sought simple answers to our life problems, or those of our patients. He would press us, insisting that we not settle for stock phrases. The first place to learn was from within. He seemed to thrive on teaching those who were prepared to follow his example of demanding self-examination, often a painful process, with felt reasoning that could result in an informed heart. Bettelheim treasured the written word. Fortunately, unlike Socrates, and despite believing that the best learning comes dialectically, he wrote.
