Archaeological Theory and Scientific Practice

 practiced archaeology in this volume. Thus practitioners have been slower than adherents to acknowledge their discipline's intellectual worth. Indeed, this volume will be of great interest to archaeologists, anthropologists, and historians of science, providing a comprehensive overview of the discipline's development as a modern scientific enterprise.

Archaeology, History, and Society in Galilee

Richard A. Horsley 2016-03-24 In this book Richard Horsley attempts to construct bridges of communication and engagement between the fields of archaeology and history focused on developing a better understanding of Galilee. Scholars consider that until the mid-20th century Galilee was inadequately understood without consideration of the connections between the village and city patterns of power relations between Galilee, Palestine, and the Roman Empire. The book is divided into four parts: Part One provides a background on Galilee and its history, Part Two looks at the evidence for Galilee in the first century CE, Part Three looks at the early Galilee in the Roman period, and Part Four looks at the evidence for Galilee in the Byzantine period.

Trade and Exchange

Carolyn D. Dillian 2009-12-05 Long before the advent of the global economy, foreign goods were transported, traded, and exchanged through myriad means, over short and long distances. Archaeological tools for understanding trade and exchange have been a primary focus of prehistoric archaeologists for many years. Examining the impact of trade on the micro-, meso-, and macrosocieties that existed in the past is of great interest to archaeologists, anthropologists, and historians of science.
